Summary

4th-year B.Tech Computer Science and Engineering student at NIT Calicut with interests in Data Science, Machine Learning and Artificial Intelligence.

Skills

- Programming Languages - Proficient: Python, SQL, C++, C; Intermediate : R, HTML, CSS, x86 Assembly, Verilog

Education

NIT Calicut / B.Tech (Computer Science and Engineering)

2017 - 2021 (expected), Calicut

CGPA: 7.90 (at the end of 6 semesters)

Vijayagiri Public School / Senior Secondary

2016, Thrissur

CBSE Board : 89.3%

Our Own English High School, Boys Branch / Secondary

2014, Sharjah, UAE

CBSE Board : 89.3%

Project

- **COVID - 19 Fake News Detection (Ongoing)**

Currently working on a deep learning model that can differentiate fake articles/messages with minimal features.

- **Health Centre Database Management System (Course Project)**

Designed a website which facilitated record keeping and management of a health centre.

- **Arduino IOT Dustbin (Course Project)**

Designed and implemented a dustbin with a fill-level indicator and a Bluetooth module to send information to your phone.

Training and Workshops

- Acquired the Machine Learning and Deep Learning certification from Coursera
- Attended the Web Development workshop conducted by the CSE department of NIT Calicut in February 2018

Positions of Responsibility

- Instructor at an introductory python class for juniors, as part of a 2-day "Artificial Intelligence" crash course conducted at NIT Calicut.

Additional Details

- Have basic experience using the Arduino Uno.
- Interests include surfing the web, travelling and aviation.
